

Kronospan goes Carbon Positive

Two internationally recognised environmental standards, which cement those certified as leaders in sustainability, have been awarded to Kronospan. The producer of high quality wood-based panels and associated products has had its carbon footprint independently measured and certified by BlueGreen Carbon, and can now officially supply Carbon Positive chipboard products.

Kronospan manufactures its panels in the UK using wood sourced from FSC certified sustainable forests and recycled wood to produce MDF, chipboard and melamine faced panels for use in domestic and commercial kitchens, bathrooms and flooring systems. The BlueGreen Carbon standard, awarded for all chipboard products, recognises Kronospan's carbon mitigation policy, which has been in place at its UK manufacturing site for almost a decade.

Iain Ferguson, environmental manager at Kronospan, explains: "Over the past 10 years we've invested upwards of £15 million in making our processes more environmentally friendly. We looked at how we could use materials differently, cleaned up the materials coming in to the factory and removed any contaminants.

"We've worked with our whole supply chain to make sure that at every stage of the sourcing process there are consistent quality protocols in place, ultimately encouraging our suppliers to improve the standard of materials sent to us. For this reason we didn't need any environmental 'credits' or to offset any extra carbon to achieve the BlueGreen Carbon standard as our processes were already so sustainable."

Earlier this year Kronospan was also awarded the CARB accreditation, a US-based standard, which recognises manufacturers that produce MDF panels with a far lower content of formaldehyde than the industry standard. Kronospan achieved both phase one and phase two of the accreditation, and MDF panels meeting these criteria are in production for retailers throughout Europe, further improving the company's sustainability arsenal and complementing its carbon positive status.

Iain continues: "As sustainability issues continue to top the specification agenda, more and more customers are asking for proof that our environmental systems are robust. We've always had incredibly high sustainability standards, but to have this recognized by official third party organisations reassures our customers that our products and processes operate with the utmost respect for, and minimal possible impact on, the environment."

About Kronospan

Kronospan is the UK's leading manufacturer of high-quality wood-based panels and associated products, supplied to customers in the furniture, construction, distribution and DIY industries. Kronospan provides a full range of products, from the raw state, such as chipboard, MDF and melamine-faced, through to laminated flooring and worktops. For more information visit

About BlueGreen Carbon Offsetting

THE CARBON MANAGEMENT PEOPLE Take your organisation to carbon neutral status

Enhance your marketing and corporate responsibility strategy, whilst tackling climate change and demonstrating leadership in your sector.

At BlueGreen Carbon we enable organisations and individuals to offset their carbon footprint, certifying them as carbon neutral.

We supply high quality, ethical carbon credits that include strong social and biodiversity benefits in addition to measured carbon mitigation.

Our Carbon Management solutions include carbon auditing, carbon offsetting, carbon modelling and UK & international biodiversity projects.

Please contact us to discuss how we can offset your carbon emissions with one of our consultants.
